

Learning Guide Unit 5

Overview

UNIT 5: Object-Oriented Concepts in PHP

Topics:

- Principles of Object-Oriented Programming (Encapsulation, Inheritance, and Polymorphism)
 - Defining classes, objects, constructors, and destructors
 - Access modifiers: public, private, and protected
 - Inheritance and polymorphism: extending classes and overriding methods
-

Learning Objectives:

By the end of this Unit, you will be able to:

1. Apply OOP principles to design modular and reusable PHP code.
2. Create and manage classes, objects, and inheritance structures.
