

Learning Guide Unit 3

Overview

UNIT 3: Functions, Arrays and String Manipulation in PHP

Topics:

- Defining and using functions for modular code in PHP
 - Working with arrays: indexed, associative, and multidimensional
 - PHP built-in functions for arrays
 - String manipulation functions in PHP
-

Learning Objectives:

By the end of this Unit, you will be able to:

1. Create reusable functions for modular code.
2. Manipulate and manage arrays using built-in PHP functions.
3. Apply PHP string manipulation functions to process text effectively.
